

COMPANY PROFILE

ABOUT US:

ENYE Electrical is an entrepreneurial initiative established in 2014, with a primary focus to be a leading independent service provider, offering any electrical solutions to both public and private sectors.

Our key focus is **SERVICE DELIVERY** no matter what the challenge.

OUR SERVICES:

Our focus areas are primarily:

- New Installations of electrical systems
- Maintenance of existing electrical systems
- Upgrading of any electrical systems
- Designing and installing custom Solar systems
- Upgrading and maintenance of custom Solar systems
- Certificate of Compliance for electrical & solar

ENYE Electrical prides itself on the ability to focus on all customers as an individual so that the clientele feel they are just as important to us as the next person. **NO EXCEPTIONS.**

SKILLS:

The owner of ENYE Electrical is fully qualified in the following:

- National Certificate (N3) - Theory
- National Trade Certificate – Trade Test
- Registered Person – Wireman's License

All additional technical staff are required to go through the standard process of technical training starting from an apprenticeship working towards becoming a semi-skilled person to being a skilled person and finally

obtaining his/her Trade Test Certificate. All phases are supported by either Owner or a Tradesman within the company.

PRODUCTS: All products sourced/supplied by ENYE Electrical are SANS-10142 approved and installed as per code. This means that products have working warranties and are backed by registered electrical wholesalers in South Africa.

CLIENT BASE: Our services rendered are, but not limited to:

- Homeowners
- Real Estate
- Property Developers
- Commercial Institutes

EXPERIENCE: Owner has been in the electrical industry for 19 years although ENYE Electrical was only established in 2014 as a business and finally registered in 2023.

BASE OF OPERATIONS: Currently ENYE Electrical covers Pretoria and surroundings and trying to expand to Johannesburg and surroundings and beyond.
